

Job Title **PPIC specialist**

Division/Department Production planning

Position status Regular Fulltime

Reports to Operational director

Start Earliest 02/2017

PT. Indonesian Tooling Technology is a young and reliable manufacturer of superior precision tooling for mainly the international fastener market. Since the company is growing and operates in a dynamic and growing market, ITT can offer its employees a challenging working environment and opportunities for personal development. As well as investing in product innovation, ITT invests in its employees and organisation.

GENERAL DESCRIPTION OF THE JOB

With a growing business, Indonesian Tooling Technology needs an additional production planner in order to support the production department. The production planner is responsible for scheduling and monitoring production and machinery capacity and reports directly to the operational director.

YOUR RESPONSIBILITIES

1	Prepare and monitor production schedules to meet customer delivery times and capacity targets.
2	Production planning and monitoring in ERP-system and Microsoft Excel based tools.
3	Reporting planning performance and production output to BoD.
4	Actively engage in production process improvement to support ITT's continuous improvement efforts.
5	Closely cooperate with purchasing department to coordinate raw-material demands.
6	Cooperate with sales department to control and reach the agreed delivery times to customers.

YOUR QUALIFICATIONS

1	1 -2 years working experience within a production factory.
2	Familiar with production processes and production planning approaches.
3	S1 degree required. S1 degree in technical or production subjects are preferred.
4	Analytical skills, dynamic, open minded and self-motivated.
5	Indonesian is mandatory. Fluent in English (written & communication).
6	Proficient in use of MS Office such as Excel/Word. VBA coding skills preferred.

We are looking forward to your application!
